PROFESSIONAL SUMMARY

Informatics graduate from Universitas Teknologi Yogyakarta (GPA: 3.62) specializing in web and mobile application development using Laravel, Next.js, and Flutter. Combines strong technical proficiency with hands-on experience in customer relations to build user-centric digital products. Adept at translating business requirements into efficient code, working effectively in team and independent settings, and maintaining a detail-oriented, fast-learning, and disciplined approach to problem-solving.

WORK EXPERIENCE

PT Lion Super Indo – Sleman, Special Region of Yogyakarta

Jan 2026 – Mar 2026

Seasonal Grocery Associate

- Managed store operations and optimized planograms to maximize the visibility of FMCG products.
- Handled micro-supply chain management through inventory audits and the implementation of FIFO/FEFO-based Quality Assurance to mitigate asset shrinkage.
- Operated high-accuracy Point of Sale (POS) systems, performed cash reconciliation, and executed end-of-day financial reporting according to standard financial procedures.
- Collaborated with cross-functional teams to ensure efficient logistics distribution workflows, maintain customer satisfaction (CSAT) metrics, and enforce modern retail sanitation and safety standards.

Universitas Teknologi Yogyakarta – Sleman, Special Region of Yogyakarta

Feb 2025 – Dec 2025

Application Developer (Final Project)

- Designed and implemented "Motocare," a vehicle maintenance mobile application using the Flutter framework and MySQL database.
- Integrated Global Positioning System (GPS) technology for actual mileage tracking and accelerometer sensors to validate real-time vehicle usage.
- Engineered an automated service notification system based on accumulated mileage and integrated a direct-link e-commerce interface to optimize spare parts procurement.
- Validated system functionality comprehensively using Black Box testing methodologies to guarantee tracking algorithm accuracy, notification reliability, and software architecture stability.

EDUCATION

Universitas Teknologi Yogyakarta

2022 – 2026

Bachelor of Informatics (GPA: 3.62)

SKILLS

Programming & Frameworks: Flutter, Laravel, Node.js, React, Next.js, Tailwind CSS, JavaScript, HTML, Python, Java.

Design & Multimedia: UI/UX Design (Figma), Graphic Design, Photo Editing, Video Editing (CapCut).

Core Competencies: Front-End & Mobile App Development, Data Modeling, Data Visualization, Software Engineering, Data Analysis, Critical Thinking, Project Planning, Microsoft Excel, Microsoft Office.

CERTIFICATIONS & TRAINING

Java Best Practices for Efficient, Scalable, and Secure Code <i>Udemy</i>	Sep 2026
Operations Industrial Engineer Job Simulation <i>Siemens</i>	Aug 2026
Front-End Software Engineering Job Simulation <i>Skyscanner</i>	Aug 2026
Create a Data Visualization with Python <i>IBM SkillBuild</i>	Aug 2026
Data Analyst Job Simulation <i>Deloitte</i>	Jul 2026 – Aug 2026
JavaScript Essentials 2 <i>Cisco Networking Academy</i>	Jul 2026 – Sep 2026
TOEFL Certification <i>Universitas Teknologi Yogyakarta</i>	Mar 2025 – Mar 2030

ACHIEVEMENTS

Sinta 4 Indexed Article Publication	2025
• Formulated and validated an adaptive vehicle maintenance system architecture integrating machine learning. • Combined K-Means Clustering to accurately classify user driving behavior into intensity segments and implemented a Rule-Based System to dynamically modify target service intervals. • Constructed a proactive, personalized, and intelligent recommendation system operating exclusively through advanced software engineering, eliminating the need for additional hardware installations on vehicle engines.
